

Bhuku

UI Requirements

User Task

1. User receives an inspiring quote as notification from Bhuku, and wants to check that book and mark as WANT TO READ.
2. User wants to find a book to read based on Bhuku's recommendation for her.
3. User wants to find a book in Mystery Thriller section and see which one is best for them to read, and to read a preview of the book.

Pages to design

- Home Screen
- Item/Book Page
- Search Page
- Category Page

High level requirements

A home screen which is customized based on users interests and it is interchangeable. Additionally, it will have a section that will recommend books to users based on their inventory, likes and books read, as well as favored genres. A detailed search page which allows users to search for books in multiple ways. Filtering and sorting options will let users narrow down their search and choose the book from a selection of books to read.

Detailed Requirements

Home Screen:

- ☛ A Mood section offering books based on users mood
- ☛ 2017 [year]best seller section
- ☛ Popular this week section
- ☛ You may also like section
- ☛ Friends Read section showing what friends are reading
- ☛ And a section that is picked specifically for the user

Item/Book page:

- ☛ Design a page that includes title go the book, description, author and details
- ☛ Ability to rate the book- read the reviews and view ratings
- ☛ Share the book
- ☛ Mark as read, reading and want to read or add it to a section in library

Search page:

- ☛ Search Bar
- ☛ Filtering and sorting options to narrow down the search
- ☛ Search by Genres
- ☛ New Released this month
- ☛ and, search by latest reviews on books

Category page:

- ☛ List of available books in that category with their ratings
- ☛ Filtering and sorting options to narrow down the search
- ☛ Search Bar
