

UI Requirements

User Task

1. User wants to look for a couple of his contacts to know if they use Spotify and add them as friend
2. User wants to get the latest updates from Drake, one of the artists he follows, he wants to learn about the latest news and his newly released song.

Pages to re-design

- Homepage
- Browse page
- User profile

Pages to add

- Browse > **Artists**
- User Profile> Find Friends > **contacts**
- User Profile > Find Friends > **Spotify users around me**

High level requirements

A redesigned homepage which allows users to continue enjoy the app and all the useful features it offers, additionally it will have a section that will enable users to get the updates about the artists they follow for better user experience. Additional options will provide easier ways for users to connect with friends, which in return will improve engagement and retention on the app.

Detailed Requirements
